

# TO OUR FRIENDS:

THAT LITTLE PUBLICITY has been given to the large earnings of insurance companies is, perhaps, due to the fact that insurance capital has been closely held in certain well-known sections of the East, but has drawn large revenues annually from all parts of the country. Naturally those few who are profiting thereby do not advertise the fact, which would encourage the establishment of other large companies. It appears, therefore, very significant that while at the close of years which are marked by heavy losses, and notwithstanding a panic which forced the sacrifice of securities in every other line there is no record of any offering of stock in the insurance companies having a large capitalization and a substantial surplus; but, on the other hand, dividends to stockholders have increased and large gains shown in the earning accounts of such companies.

**THE TWO REASONS WHY** the public have an opportunity to purchase stock in the Occidental Fire Insurance Company:

**FIRST:** The Occidental Life Insurance Company cannot sell Fire Insurance under its present charter; hence, it is necessary for a new charter capital stock and surplus amounting to about four hundred thousand dollars. If it were possible for the Occidental Life Insurance Company to sell Fire Insurance under its present charter, **NOT ONE SHARE OF STOCK WOULD BE OFFERED FOR SALE.**

**SECOND:** The incorporators of the Occidental Fire Insurance Company not having available, for investment, the amount of cash necessary, are offering the stock to the citizens of the Southwest, until such a time as this amount of money is raised, after which there **WILL BE NO MORE STOCK FOR SALE.**

If you are interested in an investment that is not speculative, but safe and sure of big returns on your money, drop us a postal card and we will mail you complete details of our proposition.

OCCIDENTAL FIRE INSURANCE COMPANY,  
Albuquerque, N. M.

## GOLD DREDGE WORK ACCOMPLISHED

Prescott, Ariz., April 4.—White active work has already been done on the Eleanor Phalen Mining company's properties in French Gulch, nothing permanent has been done to date. It is stated, however, that the operations will soon be put upon a permanent basis.

Joseph Mackin, general manager, while in the city yesterday, made an interesting report of the purposes for which the large plant was installed, and stated that the main difficulty which has been a lack of water to float the boat, has been overcome. The trying out of the large and intricate mechanical equipment has been solved, and it is his belief that the enterprise will proceed without encountering any further obstacles. For the present the surface soil is being stripped, and while values are necessarily nominal, from previous tests made in the bedrock zone, it is his belief the project faces a good future.

The interests of this company cover a wide range of territory, and an unlimited dredging area is available. The dam has a surface area of 80 feet in width, 25 feet high and the lake extends up stream over half a mile. The capacity could be increased if desired to cover a length of nearly two miles, or up to the camp of the Mine Development company. Beginning on the first of April two shifts will be placed at work, and dredging will be conducted permanently.
